

How to Add DNet Email to iDevice

1. On your iPhone or iPad's **home screen**, press **Settings**.

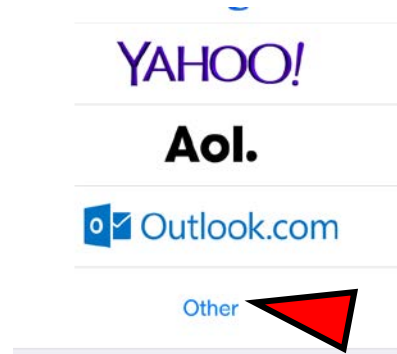

2. In the **Settings** menu, scroll down and press **Mail, Contacts, Calendars**.

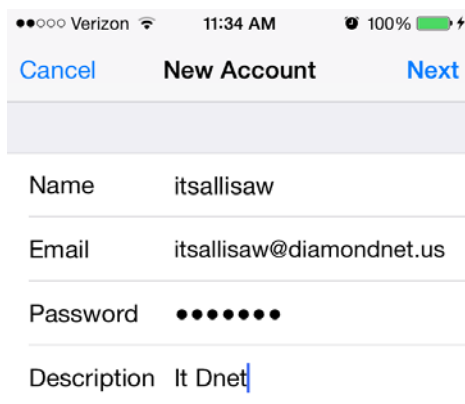

3. Under the **Accounts** header, press **Add Account**.

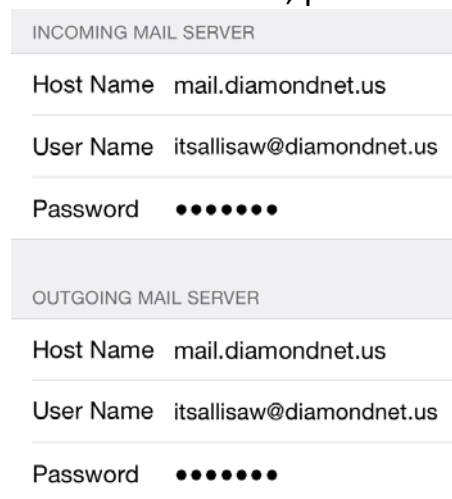

4. On the **Add Account** screen, select **Other**.

5. On the **New Account** screen, fill in all of the fields making sure to include the "**@diamondnet.us**" in the email field as shown, then press **Next**.

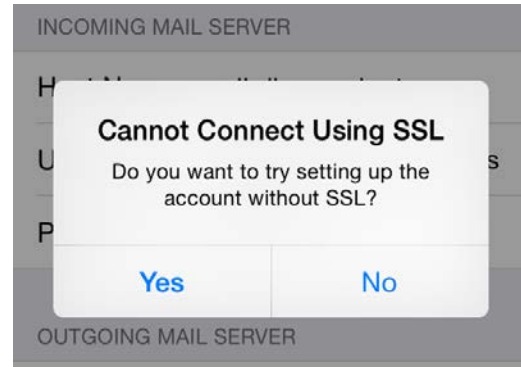

6. On the next screen, fill out the incoming and outgoing mail server information just as shown. Replace the **User Name** shown, with your email address. When finished, press **Next**.

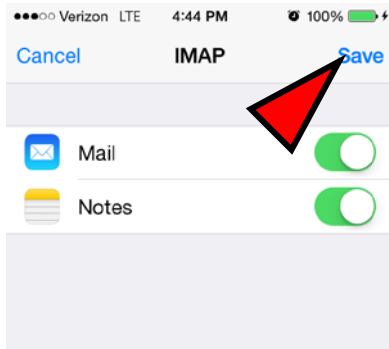

Note: It may take a few minutes to verify the account information.

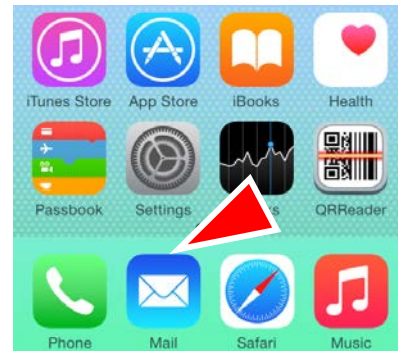

Note: If an error message appears stating "Cannot connect using SSL. Do you want to try setting up the account without SSL?", press 'Yes'.

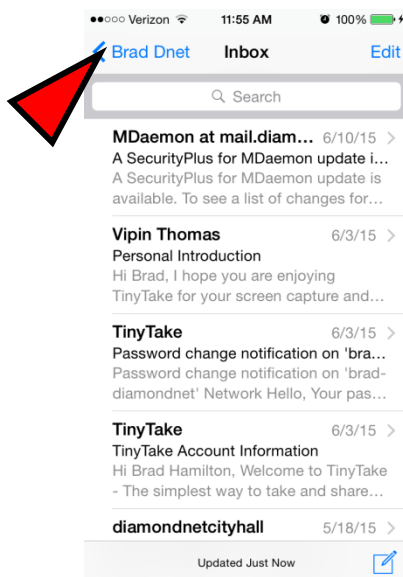

7. On the **IMAP** screen, ensure that the desired services are turned on, and press **Save**.

8. Return to the home screen, and press Mail.

9. You may have to hit the back arrow as shown in order to exit your default email account.

10. All of your email accounts should now be accessible under the **Accounts** header in the **Mailboxes** screen.
